## § 284.9

from any resale to a replacement shipper credited to the releasing shipper's reservation charge.

(g) To the extent necessary, a firm shipper on an interstate pipeline that offers transportation service on a firm basis under subpart B or G of this part is granted a limited-jurisdiction blanket certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act solely for the purpose of releasing firm capacity pursuant to this section.

(h)(1) A release of capacity by a firm shipper to a replacement shipper for any period of 31 days or less, or for any term at the maximum tariff rate applicable to the release, need not comply with the notification and bidding requirements of paragraphs (c) through (e) of this section. A release under this paragraph may not exceed the maximum rate. Notice of a firm release under this paragraph must be provided on the pipeline's electronic bulletin board as soon as possible, but not later than forty-eight hours, after the release transaction commences.

(2) When a release under paragraph (h)(1) of this section is at less than the maximum tariff rate, a firm shipper may not roll-over, extend, or in any way continue the release at less than the maximum tariff rate without complying with the requirements of paragraphs (c) through (e) of this section, and may not re-release to the same replacement shipper under this paragraph at less than the maximum tariff rate until twenty-eight days after the first release period has ended.

(i) Waiver of maximum rate ceiling. Until September 30, 2002, the maximum rate ceiling does not apply to capacity release transactions of less than one year. The provision of paragraph (h)(1) of this section providing an exemption from the posting and bidding requirements for transactions at the applicable maximum tariff rate for pipeline services will not apply as long as the waiver of the rate ceiling is in effect. With respect to releases of 31 days or less under paragraph (h) of this section, the requirements of paragraph (h)(2) of

this section will apply to all such releases regardless of the rate charged.

## § 284.9 Interruptible transportation service.

- (a) Interruptible transportation availability. (1) An interstate pipeline that provides firm transportation service under subpart B or G of this part must also offer transportation service on an interruptible basis under that subpart or subparts and separately from any sales service.
- (2) An intrastate pipeline that provides transportation service under Subpart C may offer such transportation service on an interruptible basis.
- (3) Service on an interruptible basis means that the capacity used to provide the service is subject to a prior claim by another customer or another class of service and receives a lower priority than such other classes of service.
- (b) The provisions regarding non-discriminatory access, reasonable operational conditions, and limitations contained in §284.7 (b), (c), and (f) apply to pipelines providing interruptible service under this section.
- (c) Reservation fee. No reservation fee may be imposed for interruptible service. A pipeline's rate for any transportation service provided under this section may not include any minimum bill provision, minimum take provision, or any other provision that has the effect of guaranteeing revenue.

[Order 436, 50 FR 42494, Oct. 18, 1985]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §284.9, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

## § 284.10 Rates.

(a) Applicability. Any rate charged for transportation service under subparts B and G of this part must be established under a rate schedule that is filed with the Commission prior to commencement of such service and

that conforms to the requirements of this section.

- (b) Rate objectives. Maximum rates for both peak and offpeak periods must be designed to achieve the following three objectives:
- (1) Rates for service during peak periods should ration capacity;
- (2) Rates for firm service during offpeak periods and for interruptible service during all periods should maximize throughput; and
- (3) The pipeline's revenue requirement allocated to firm and interruptible services should be attained by providing the projected units of service in peak and off-peak periods at the maximum rate for each service.
- (c) Rate design—(1) Volumetric rates. Except as provided in §284.7(e), any rate filed for service subject to this section must be a one-part rate that recovers the costs allocated to the service to the extent that the projected units of that service are actually purchased and may not include a demand charge, a minimum bill or minimum take provision or any other provision that has the effect of guaranteeing revenue. Such rate must separately identify cost components attributable to transportation, storage, and gathering costs
- (2) Based on projected units of service. Any rate filed for service subject to this section must be designed to recover costs on the basis of projected units of service. The fixed costs allocated to capacity reservations, as determined in accordance with §284.7(e), should be used along with the projected nominations accepted by the pipeline to compute the unit reservation fee. The remaining fixed costs and all variable costs should be used to determine the volumetric rate computed on the basis of projected volumes to be transported. The units projected for the service in rates filed under this section may be changed only in a subsequent rate filing under section 4 of the Natural Gas Act.
- (3) Differentiation due to time and distance. Any rate filed for service subject to this section must reasonably reflect any material variation in the cost of providing the service due to:

- (i) Whether the service is provided during a peak or an off-peak period; and
- (ii) The distance over which the transportation is provided.
- (4) Cost basis for rates. (i) Any maximum rate filed under this section must be designed to recover on a unit basis, solely those costs which are properly allocated to the service to which the rate applies.
- (ii) Any minimum rate filed under this section must be based on the average variable costs which are properly allocated to the service to which the rate applies.
- (5) Rate flexibility. (i) Any rate schedule filed under this section must state a maximum rate and a minimum rate.
- (ii)(A) Except as provided in paragraph (d)(5)(ii)(B) of this section the pipeline may charge an individual customer any rate that is neither greater than the maximum rate nor less than the minimum rate on file for that service.
- (B) If a pipeline does not hold a blanket certificate under Subpart G of this part, it may not charge, in a transaction involving its marketing affiliate, a rate that is lower than the highest rate it charges in any transaction not involving its marketing affiliate.
- (iii) The pipeline may not file a revised or new rate designed to recover costs not recovered under rates previously in effect.

[Order 436, 50 FR 42493, Oct. 18, 1985, as amended at 50 FR 52274, Dec. 23, 1985; 53 FR 22163, June 14, 1988; Order 522, 55 FR 12169, Apr. 2, 1990; Order 581, 60 FR 53072, Oct. 11, 1995. Redesignated and amended by Order 637, 65 FR 10220, Feb. 25, 2000]

## § 284.11 Environmental compliance.

- (a) Any activity involving the construction of, or the abandonment with removal of, facilities that is authorized pursuant to §284.3(c) and subpart B or C of this part is subject to the terms and conditions of §157.206(b) of this chapter.
- (b) Advance notification—(1) General rule. Except as provided in paragraph (b)(2) of this section, at least 30 days prior to commencing construction a company must file notification with the Commission of any activity described in paragraph (a) of this section.
